Adapter UNI PRO Dual Plus 8bit

Product ID: 22595

Price: **29.00 EUR**

Product weight: **0.10 kg**

Description:

Adapter UNI PRO Dual Plus 8bit allows you to use existing MR adapter adapters for PC3000 v4, VNR Rusolut and Soft Center Flash Extractor to connect two-channel monolithic cards, for which there are no adapters and it is necessary to connect by soldering. Thanks to the adapter, all you have to do is solder the card only once and then you can connect it to different devices in order to read / correct errors in a very simple way from two channels. In addition, the adapter has outlets to connect the logic analyzer and SD interface as well as the USB bus (UFD memory connection) for easier signal analysis.
