Carbon Thermal Conductive Paste 1 g - Syringe

Product ID: 23446

Price: 6.00 EUR

Product weight: 0.10 kg

Description:

Carbon Thermal Conductive Paste 1 g - Syringe

Carbon thermal conductive paste is a specialized preparation designed for heat dissipation from processors, graphics cards, and other electronic components generating high temperatures. The product is characterized by a thermal conductivity of 15.2 W/mK and a thermal impedance below 0.0008 °C?in?/W. The formulation of the preparation is based on carbon nanoparticle technology, which ensures parameter stability over long-term operation. The paste features a structure that facilitates application and complies with the requirements of the EU RoHS directive for safety and ecology.
