Guardonix USB 3.0 Writeblocker

Product ID: 22705

Price: **346.94 EUR**

Product weight: **0.50 kg**

Description:

Guardonix USB 3.0 Writeblocker a feature-rich writeblocker which enables Windows applications to work with damaged/unstable storage devices, substantially accelerates flash storage acquisitions. Guardonix hardware stands between the PC and storage device, making sure that the connection to the PC is always well-maintained, regardless of the storage device status. This way even if the storage device becomes desynchronized, only its connection to Guardonix hardware will be reinitialized, which will not have any impact on the PC, allowing data acquisition to proceed without interruption. Guardonix hardware maintains a live connection even if the storage device is physically disconnected during imaging.
