IIT LC-AD11 thermal imaging camera for PCB repair

Product ID: 22484

Price: **999.00 EUR**

Product weight: **3.50 kg**

Description:

IIT LC-AD11 thermal imaging camera for PCB repair is a device for quick fault diagnosis on PCB laminates. It is a device that uses interlaced double spectral positioning technology. Thanks to the efficient software for intelligent image analysis on the PC side, the use of algorithms, the camera gives the operating temperature of any element of the motherboard live and indicates the temperature differences in its areas. Comparative analysis of the motherboard before and after the repair can quickly and accurately identify problematic systems or areas, and thus significantly speed up the repair.
