JBC NASE 2C NANO Precision Rework Station

Product ID: 22580

Price: **1249.00 EUR**

Product weight: **4.00 kg**

Description:

JBC NASE 2C NANO Precision Rework Station the precision rework station is the best solution soldering and rework of small-sized components that requiring the highest precision, including 0402, 0201, and 01005. It works with the most efficient soldering system and the intelligent hibernation mode. The precision rework station with the new temperature dynamic profiles functionality. It is possible to reliably rework MLCC capacitors as small as 008004 and other thermal shock sensitive components individually eliminating the risk of disturbing nearby components. Selectable Temperature: 90 to 450 °C / 190 to 840 °F. This station is equipped with a handle Nano NT115 - A and adjustable tweezers Nano AN115 - A. The short distance from the root to the handle ensures maximum control even with a microscope.
