MGChemicals MG8341No Clean flux paste in syringe dispenser 10ml

Product ID: 22665

Price: **14.00 EUR**

Product weight: **0.20 kg**

Description:

MGChemicals MG8341No Clean flux paste in syringe dispenser 10mlThis is our absolute favourite flux. We find compared to anything else, it lasts the longest, and doesn't "gum up" from the heat of your soldering iron like so many others. This means less time cleaning flux only to have to apply more. This is a great all-round flux, and is perfect for surface mount, through hole, hand soldering, and IR/hot air rework. MG Chemicals #8341 features a unique mixture of high grade synthetic resin and thixotropic agents designed specifically for use with high temperature lead free and conventional Sn/Pb alloys.
