Nozzle with 45degree for Quick 861 Hotair station 3pcs.

Product ID: 21981

Price: **15.00 EUR**

Product weight: **0.10 kg**

Description:

Nozzle with 45degree for Quick 861 Hotair station 3pcs is necessary for the electronics working under the microscope to allow the element to be heated without moving the microscope. Angle of 45 degrees ensures continuous operation under the microscope. Simple nozzles, which are standard equipment of the station, do not give this opportunity. We need to move the element that we want to heat, but we lose sight of the microscope, which usually ends with overheating. By using the angular nozzles you will avoid the above.
