QUICK 492E anty-static protection testing station

Product ID: 22303

Price: **519.00 EUR**

Product weight: **15.00 kg**

Description:

QUICK 492E anty-static protection testing station is a static protection station combining hand and foot testing. The testing station offers 2 test modes: Individual and Comprehensive. The Individual test mode will test the wear status of the wrist strap and single foot (or both feet) separately. The Comprehensive test mode will test the wear status of the wrist strap and both feet simultaneously. This testing station can also be connected to PC via RS232 Communication cable. Low Voltage Alarm function: The alarm indicator flashes if there is a low battery condition detected. The output signal to door control system is easy to operate, stable, and widely used.
