Test JIG NKI 7650

Product ID: 888

Price: **52.91 EUR**

Product weight: **0.33 kg**

Description:

Test JIG NKI 7650 is a device used to help diagnose problems in mobile phones. Its main purpose is to make the phone function normally outside of its case, so we can test & check all the voltages & test points. Without one, usually repairers have to guess what part is incorrect, as it is difficult to get access to the PCB with the battery connected & also the interface to the PC.
