The Mission Darkness CYPHERCYLENT Faraday Tent with Vestibule

Product ID: 23415

Product weight: 1.00 kg

Description:

The Mission Darkness CYPHERCYLENT Faraday Tent with Vestibule is an advanced solution designed to instantly create a secure radio frequency (RF) shielded environment, particularly suited for digital forensics applications. The enhanced version of the tent includes a vestibule, allowing users to enter and exit the tent without compromising the shielding of the main chamber. This makes it possible to introduce devices or personnel into the space while maintaining full isolation of equipment already inside, which is especially important for operations requiring uncompromised signal security.
