The QIANLI dust detector

Product ID: 22329

Price: **30.00 EUR**

Product weight: **1.00 kg**

Description:

The QIANLI dust detector is an integrated LED lamp system with a precisely selected wavelength of light in relation to energy density, which allows the detection of miniature dust particles in the area illuminated by the lamp. The procedure seems to be indispensable for works related to the exchange of displays, and replacement of panes in ring telephones and their protection.
