Universal Developer 110g - Bottle

Product ID: 23441

Price: 4.00 EUR

Product weight: 0.20 kg

Description:

Universal Developer 110g - Bottle

Universal developer is a specialized preparation designed for developing photoresists and positive plates used in electronics and lithography. The product formula does not contain sodium hydroxide (NaOH), which reduces the risk of skin irritation and damage to work materials. The agent ensures sharp contour reproduction and process repeatability in the production of printed circuit boards and integrated circuits. The dry product features a bulk density of 0.85 g/cm? and a whiteness level above 80%. The substance maintains structural stability over a wide temperature range, with a melting point of approximately 72°C.
