YKUSH 3 Yepkit USB 3.1 Switchable Hub

Product ID: 22647

Price: 149.00 EUR

Product weight: 0.30 kg

Description:

YKUSH 3 Yepkit USB 3.1 Switchable Hub is a three downstream port USB 3.1 Gen 1 switchable hub, where the downstream ports can be individually switch ON/OFF. The switching is controlled by software from the host system (typically a PC to which the YKUSH 3 is connected). The ykushcmd application, available for download, can be used to control the YKUSH 3 board.When a downstream is switched OFF, both the port power (VBUS) and all the data-lines (both the USB 3.1 and USB 2.0 data-lines) are switched OFF, effectively disconnecting the port. The YKUSH 3 hub is compliant with USB 3.1 Gen 1 and USB 2.0 ports with 5Gbps, 480Mbps, 12Mbps and 1.5Mbps operation. The support of very high data rates makes it suitable to data intensive applications (e.g., storage solutions) and for streaming and real time data solutions.
